9. Suggestions for changes:

- It would be even more effective if there was more time. It’s a lot of information.
- More hands-on time with cameras & equipment for lighting
- I think it was perfect.
- A little more interaction with equipment.
- More time on task; Editing on other than Apple seems a universal need in light of public schools’ depending on PCs.
- More time for hands-on with the camera.
- The logistics of how video and TV works was difficult to fully grasp. Maybe condense the info?
- Longer duration
- Could be longer duration – more days, not more hours per day. Perhaps some pre-attendance info to set up the scene.
- Less time shooting. Actually show how to go from tape to computer (camera, wires, firewire input, capturing).
- The first day was a disappointment – way too much technical info for the requirements of the attendees. Cameras should have been put in our hands right away; then once we were excited and involved, add the tech info as needed.

10. What aspect of the workshop did you like the best?

- Working in a well-run video lab; Meeting other teachers; Helpful student assistants; Calm & kind & knowledgeable instructor
- I really enjoyed myself. I thought it was well done. Howard was great and the information is valuable.
- Hands-on time; learning how to upload project to internet, etc.
- Editing, I liked getting the video in and fixing it.
- Editing, hands-on and working with staff.
- The people. New learning experiences for my students.
- Getting to film the action.
- The hands-on aspect.
- Performing skit and shooting
- The filming was great fun for an adult!
- Editing
- Meeting other teachers, learning how they use the technology; the formal informational slideshows had good info.
- Studio time afterwards, with one-on-one help.

11. What aspect of the workshop did you like least?

- Traveling was rough. That is the only thing I didn’t like. Also perhaps use [sic] laptops.
- Traveling
- The first day was too technical! I wish we had gotten to interact on lessons.
- Learning about the technical history.
- Better if the times of meeting [sic] – more time per day
- Editing is hard work, but worth knowing
- Blogging
- The presentation of the information the first 2 days was hard to swallow – very, very technical & much too much information all at once.
- The instructor was very knowledgeable & clearly well prepared, but his teaching skills were quite weak.

- Teaching to teachers is a tough thing to do, but I often felt as if we were in one class and he was in another (his response didn’t match our “output”). I also really must temper my criticisms with the fact that most of the other attendees were far more literate in computer technology than I. I found the four days to be extraordinarily frustrating, but appreciate very much the patience and assistance of everyone who helped me.

- continued -
12. Other comments:

- Thank you for the opportunity. I am sure I will use this information in my classes.
- Excellent workshop!
- Thank you so much for this amazing opportunity.
- Do It Again! More time to come back and experiment to learn … Advanced course (there’s the ego!! How about semi-advanced.)
- I would like to have learned more about the editing options to spice up my video.
- Great.
- Thanks bunches (another non-adult word.)
- I was already knowledgeable, but I have never used Apple before, so this was new. It is great for beginners.
- Very informative. I need more practice.
- Thank you! I’m so glad that I took the workshop.
